

## SPS: Spatial Prior Seeding

### Key Formulas:

$p(x) \propto V_{\text{FDK}}(x)^{\gamma}$  (density-weighted sampling probability)

$X = X_{\text{uniform}} \cup X_{\text{weighted}}$  (mixed sampling strategy)

Parameters:  $\alpha=0.2$ ,  $\gamma=1.0$ ,  $K=50,000$ ,  $\text{init\_mode}=\text{raw}$
